THE SIX JOYS OF BIRDING

- BEAUTY** - an aesthetic pleasure of the birds, their flight and songs, and the nature that surrounds them
- SIMPLICITY** - bird watching can be performed almost anywhere, with little or no gear
- DISCOVERY** - the satisfaction of puzzle-solving identifications and observing new behaviours, plus the thrill of first seeing something that had previously captured your imagination but eluded you
- COLLECTION** - the act of accumulating sightings and keeping checklists satisfies a collector's impulse, without the need for storage
- HUNTING** - the innate thrill of a hunt, without the harm
- CONNECTION** - connect to nature and socially to others in groups, or alone, as you prefer
